3 > 4 > 50

<u>3-4-50</u> is a simple but powerful way to understand and communicate the overwhelming impact of chronic disease in Vermont. <u>3-4-50</u> represents <u>3 behaviors</u> – lack of physical activity, poor nutrition and tobacco use – that lead to <u>4 chronic diseases</u> – cancer, heart disease/stroke, type <u>2 diabetes and lung disease</u> – resulting in more than <u>50 percent</u> of all deaths in Vermont.

To create meaningful change, commitment is needed from all corners of Vermont: businesses, schools and colleges, cities and towns, and individual Vermonters. 3-4-50 can inspire action at all levels, building a foundation for longer and healthier lives for Vermonters, and reduce the escalating costs to treat preventable diseases.
